What to bring to the health assessment (check list)

- Valid identification documents:
 - Preferred: Valid original passport. Photocopies will not be accepted
 - Certificate of identity (form INZ 1052)
 - Refugee travel document
 - National ID card with photo

INZ prefers that applicants provide two forms of acceptable identification when they present. At least one of these must be photo identification.

Referral letter with NZHR number(if available). If you do not have this number, we will create NZER number for you, but **you must know what type of certificate(s) is required for your visa application.**

Previous Chest X- rays, if available

If you have or have had any chronic condition or undergone major medical or surgical treatment, please bring medical records or hospital reports. Insufficient information may lead to delays and additional testing.

If you use glasses or contact lens, bring them to health assessment to avoid referral to the ophthalmologist.

ATTENTION!!!

1. IOM bears no responsibility for issuing an incorrect type of certificate, if such a certificate was requested by the applicant. IOM is not in a position to advise on the type of certificate, required for your visa application.
2. Children under 18 years must be accompanied by a parent or a legal guardian, who can sign and make decisions on their behalf.

Advice regarding health assessment

1. For your medical examination, you will be asked to take off all of your clothes except your underwear. You will be provided a gown to wear.
2. You may request a chaperon to be present during your physical examination, especially if you are to be examined by a physician of the opposite sex.
3. Do not conceal medical conditions. Deliberate attempts to hide them will be reported to the New Zealand Department of Immigration and Border Protection. The absolute majority of medical conditions are admissible, though some may require additional tests.
4. Do not conceal pregnancy. Pregnancy will not affect your immigration prospects.
5. Abstain from drinking alcohol on the day before the examination.
6. Women are advised to avoid health assessment during menstruation as it may affect results of the urine test.
8. Postpone or re-schedule your appointment if you or your children are ill with fever or rash.
